EXPERIENCE INDICATOR

An eight digit Experience Indicator is shown in the Register of Officers of the United States Coast Guard for each commissioned officer in the grade of ensign and above. The indicator contains six items of information as follows:

1st and 2nd digits --	the officer's most recent experience in his primary occupational field. See Code Table I.
3rd digit -----------	the authorized grade level of the billet in which the experience shown in digits 1 and 2 was acquired. See Code Table II.
4th and 5th digits --	the officer's most recent experience in a subspecialty outside the primary occupational field, or if no such experience has been acquired, then the next most recent experience within the officer's primary occupational field which differs from that shown in digits 1 and 2. See Code Table 1. Duty afloat other than in engineering billets is not shown (see digit 8).
6th digit -----------	the authorized grade level of the billet in which the experience shown in digits 4 and 5 was acquired. See Code Table II.
7th digit -----------	the officer's most recent experience in the field of General Administration. See Code Table III. Experience in Legal billets is not shown. Such experience is coded in digits 1 and 2 or 4 and 5 as appropriate.
8th digit -----------	the officer's most recent experience afloat in other than an engineering billet. See Code Table IV.

The purpose of the Indicator is to assist in identifying the primary occupational field, specialty within the occupational field, various subspecialities, and the level of the most recent experience for each officer. Its inclusion in the Register is to provide information of general interest. Officers whose Indicators do not appear consistent with their experience are requested to advise the Commandant (G-PO-2) so that necessary corrections may be made.

It should be noted that the effective date of the Register is 1 July 1985. Experience shown in the Indicator is changed at the time an officer is reassigned under orders, but only the Indicator effective 1 July 1985 appears in the Register.

BEST COPY AVAILABLE

Space available in the Indicator for identification of experience is limited. Some officers have experience which is not shown because of this limitation. However, most recent experience, as shown, is of greatest significance in the usual case.

Experience gained as a result of performance of a primary duty is shown in the Indicator. If several primary duties are performed simultaneously during an assignment the experience which reflects the most concrete specialty is shown. For example, in Code Table I the codes beginning with the number 7 relate to concrete specialities while those beginning with the number 0 relate to administration. Codes beginning with the number 7 will be used in preference to codes beginning with number 0.

As an officer begins service the primary occupational field shown in the Indicator is determined by the initial assignment other than a general administration billet. Thereafter the primary occupational field is changed if the officer receives special training or indoctrination or if the needs of the Service require the change.

Requests for change in primary occupational field and for specialty and subspecialty assignments shall be made by submitting Form CG-5001. Correction of Register of Officers of the U.S. Coast Guard, Commandant Instruction 1427.1G

YEAR GROUP

The following definition provides a grouping of officers which facilitates electronic data processing and statistical analysis.

The year group is based on the date an officer, who has had continuous active commissioned service since commissioning and who has not lost numbers or precedence, is originally commissioned in the grade of ensign. The year group starts with the senior such officer commissioned in a period from 1 July of a given year to 30 June of the following year and includes all officers in the order of precedence to the junior most officer commissioned during this 1 year period.

SIGNAL NUMBER

Each year at the time a new Register is printed, officers are assigned a new signal number. This number designates their seniority in relation to other active duty officers.

The signal number assigned to "Extra Number" officers will be the same number as the next senior regular commissioned officer except it will contain an alphabetical suffix. "Extra Number" officers are included on the active duty promotion list.

The signal number of officers who are not included on the active duty promotion list will be the same as that of their running mate except it will contain an alphabetical suffix.

TERMINATION DATE

The words "Termination Date" are a general term used to indicate the date upon which the officer is expected to be separated from the service. The determination of that date depends upon the officers status.

For Regular, PCTS, RPA, and warrant officers, the termination date is the mandatory retirement date for age or length of service.

For other Reserve officers the termination date may be the mandatory retirement date for age or length of service or it may indicate the completion of contracted or obligated service.

A termination date may be changed by reason of integration, contractual change, incurred obligation for training, request for release from active duty, or pending retirement or resignation.

I. D. CODE

In view of the wide dissemination outside the Coast Guard of the Register of Officers, Commandant Instruction M1427.1F the listing of social security numbers herin has been discontinued.

The "I. D. Code" consists of the last four digits of an individual's social security number and should be used only in connection with the Register as an aid to distinguish between individual's with similar names. The I. D. Code shall not be used in place of the social security number on official correspondence or where otherwise required.

SPECIAL TRAINING

The special training codes shown in previous Registers have been revised and combined with the major field codes of the Personnel Management Information System (PMIS) maintained by Commandant (G-P). Obsolete or seldom used codes have been deleted, and new ones not utilized by the old list have been added. Only codes of particular interest to, or frequently used by, personnel and program managers have been included on the current list. Subject areas not covered fall into the category of OTHER.

The special training shown for officers on the active list printed in the Register is limited to selected Staff and Command courses, major courses of instruction in special fields of 20 weeks duration or more, and off duty training leading to a degree. The PMIS includes all Major Field Codes earned by each officer. However, due to space limitations, a maximum of two codes (the two most recently acquired) can be shown in the Register.

Commandant (G-P) has promulgated in the PMIS Manual, Commandant Instruction M1080.5A, instructions for all officers and warrant officers to report Major Field Codes, their associated level of training, and year obtained. Codes printed for each officer in this edition of the Register were converted by means of computer processing. Officers finding errors which have occured during the conversion process should have them corrected by using the PMIS instructions.
